1.0   Purpose of this document

The purpose of this Project Abstract document is to fully document the specifications and requirements for a Hospital Management System (HMS). This HMS software is a web application that is developed to optimize and digitalize all kinds of operations that takes place in a hospital and to improve the quality of healthcare services, reduce operating costs, and to improve and organize the revenue cycle of the hospitals. These features include patient registration, appointment scheduling, reports management, helpdesk facility, prescription generation, staff management, accounting/billing management, etc.

2.0   Business Case

<POD to fill>
